# InSpec® 2-component pouches (burstable) Instructions for application preparation

### **Saturated cleaning wipes**

## **Saturated mop covers**

1 Put the 2-component pouch on a hard steady horizontal surface (label face up).

Flatten the liquid sections to ensure the preparation is transferred to the wipes section.

2 With outer packaging still in place, roll the pouch from the liquid section outer edge and apply pressure to force liquid across the burstable barrier to saturate the wipes.

Wait for 1 minute, then remove the transparent outer bag

1 Place the 2-component pouch on a flat surface and roll up the right liquid section, then hold it firmly with one hand and press it with the other hand downwards, around the inner pouch section 1 to make it bursts open. Press out the content

3 To ensure maximum flow of the biocide to the mop cover side, roll and compress the liquid side of the pouch to force all the liquid into the section with the mop covers.

2 Turn the pouch upside down – the back is facing you – and roll up the remaining right-hand fluid section. Hold it with one hand and press it with the other hand downwards, so that the inner pouch section 2 bursts open. Press out the content completely.

4 Leave flat for one minute so that the biocide can completely saturate the two mop covers.

5 Open the section with the mop covers using the tear notch to pull them out. Use them within a maximum of 2 hours.

Any combination of biocidal or sporicidal ready-to-use solutions is an ideal partner for rotational disinfection.

InSpec™ Burstable Pouches are manufactured according to GMP in an ISO 14644-1 Class 6 cleanroom. The products are filled and sealed in an ISO 14644-1 Class 5 environment.

Each pouch is delivered in two separate, fully sealed, flexible PE pouches for aseptic cleanroom transfer.

# head: it is ready for action.

Figures: Redditch Medical

Attach the mop cover on the mop

Safe application:

Always wear suitable gloves, goggles or face protection and an appropriate clothing.

Always read the label and the safety data sheet before use.

2-component pouches with wipes (15 pieces) have two, those with mop covers (2 pieces) have three inner sections, 195 ml, i.e. 390 ml ready-to-use solution.

This innovative dosage form guarantees wiping and product efficacy over the entire shelf life (12 to 24 months).

Until the time of use, the wipes and mop covers are sterile. The product should be used within a normal cleanroom working time (wipes max. 10 hrs./mop covers max. 2 hrs.).
